### **DETAILED ACTION**

1. The following is an examiner's statement of reasons for allowance: The applicant's amendment has place the case in the state of allowance, for further reasons see the last office action.
2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference Yanase (JP02017680A) discloses a light modulator that is controlled by two optical transistors, in which the first transistor when turned on allows a voltage to be applied to the light modulator putting it into an active state, but it does not vary this active state. A second transistor is used to balance the voltage which then varies the active state of the light modulator. However, the instant claimed invention is above Yanase because it uses a single photo conductive region which creates different electric field strengths which varies the active state of the light modulator (see section 0023 of the specification), and it is above originally cited reference Pratt Jr. et al because it has two photo conductive regions.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard Hanig whose telephone number is 571-272-2329. The examiner can normally be reached on M-F: 8:00-4:30.
